RED CROSS TOWER

On October 24 at 8:30 a.m. the crew began arriving at the Red Cross building for the purpose of removing the top 70 feet of tower, removing the beam antenna and locating the Red Cross antenna on the remaining 60 feet. The crane arrived at 9:35 and preparations were made for lifting the sections off all in one grab. Coax had already been removed and the top two sets of guy wires were removed as the crane moved into place. At 10:10 a.m. the boom lifted and the tower and antennas were free. After it was lowered to the ground, the antennas were removed and the top section was located on top of the remaining 60 feet for the attachment of the Red Cross antenna. At 10:50 a.m. the crane was on its way and all that remained was minor cleanup and a few finishing touches. Credit has to be given to Bob, KA9BXG, for the engineering of this event. Everything went off without a "hitch". Bob Coppens, the crane operator, commented on the crew, "When you have a crew as organized as this, all I do is stand there and push a few levers, everything goes so much faster, I was really impressed." Thanks to the Crew, that gave their time and energy. It couldn't have been done without you. Bob, K9VCN; Jerry, WB9KOA; Mike, WD9EGE; Scott, KB9AMM; Earl, KB9DSV; Lee, N9MPU; Keith, N9NOF; AND Joe, N9LLA. Total cost: \$65.00. Thanks to all!!

John, KE9AS.
